

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

If you have any control over Cable Providers I also urge you to control the cost they impose on the US public. \$50 plus is nothing but a pure raping of the US consumer. If phone service is regulated so should cable providers. The services they provide, cable and internet, are too expensive for the general public and are we not the ones you are to protect?

Under the Bush admin ... it's all about big business and the rich. The rights of the middle and lower class are not protected at all.

It makes me sad to be an American under the Bush(shit) administration. The man has no grip on the common man only his rich friends! So Sad!!!!

Keep the USF Fair!

Sincerely,

Russell N. Steed
